

September - December Events

#DiscussAI is ADAPT's interactive and collaborative programme of public events about Artificial Intelligence and how this ground-breaking technology impacts all of our lives and society.

All of our events are **free** and we'd love to welcome you at one of our discussions soon.

Through the **#DiscussAI** programme, ADAPT researchers seek to engage communities and individuals across the country in conversations that raise and answer questions, and generate ideas for new research.

Visit our website adaptcentre.ie/discussai to register.

ADAPT #DiscussAI Schools programme

AI IN MY LIFE

AI in My Life engages TY students in a dialogue around the societal implications of emerging AI innovations. The teacher-led module was co-created with transition year students to ensure that the content resonates with students and their concerns about AI. Through a series of interactive, thought-provoking resources, TY students will explore how research can ensure that AI is inclusive of everyone.

Interested teachers can email anne.kearns@adaptcentre.ie for more information.

AILO: The All Ireland Linguistics Olympiad (AILO) challenges secondary school students to develop their own strategies for solving complex problems in unfamiliar languages from around the globe. AILO is helping to foster a strong pipeline of talented STEM problem solvers for Ireland.

To organise a workshop at your school, register at: ailo.adaptcentre.ie

Happy Maths

Happy Maths' is a research project on serious games, driven by ADAPT researchers at TU Dublin. Happy Maths develops games which aim to help students overcome anxiety related to Maths learning. During interactive Happy Maths workshops, players have to crack a number of codes to solve puzzles.

Interested teachers can email mariana.rocha@adaptcentre.ie for more information.
